New Cirgon MediaFrame 100 LCD Display

Cirgon offers an elegant line of display systems that enable you to enjoy your digital media with ease.

The flagship product - the MediaFrame 100 - is a framed 19" wall-hanging LCD display with powerful embedded features that enable you to sort, manage, and edit your digital photos, plus you can combine them with music to create stunning slide shows to share with friends and family. No PC or Mac required. It hangs on your wall as a piece of fine art, and allows you to enjoy your favorite photos and music anytime with a click of the remote control.

Fans come from all age groups and lifestyles, but share a common desire: to share a unique photo viewing experience with their family.

With Cirgon MediaFrame™ 100 you can:

Store over 10,000 photos.

Easily download photos from your camera to storage unit.

Edit your photos in easy-to-manage albums.

Crop photos to create a better image.

Create backup copies of photos on CD/DVD with the built-in burner.

Create albums of music to play with your photos.

Create stunning slideshows of your photos and combine them with your favorite music.

Resize your photos for email with a simple copy and paste command.

All of this is done with an easy-to-use, custom remote control in the comfort of your living room, family room or home theater. No keyboard or mouse is required.

Price: \$1995.00. All Cirgon products maybe purchased at www.cirgon.com.

There are a few options to consider when ordering the MediaFrame 100:

Choice of Frame- The unit can be ordered with a choice of three frames: Black, Gold, or Silver. It can also be ordered with no frame if you would like to put your own frame on the unit to match your decor. Any 16X20 inch frame can be used. The frame attaches to the unit with four screws which are supplied.

External Storage Devices - A USB Flash Drive is used for transferring files to and from your computer to the MediaFrame. The Flash Card Reader is used to transfer photos from your camera flash card to the MediaFrame. It supports most flash card types.

Expanded Storage - You can order your MediaFrame with more storage capacity. 320 GB will hold up to 30,000 photo images based on a 5 MB image. 500 GB will hold up to 50,000 images based on a 5 MB image. Adding music will reduce the amount of photo storage available.

VESA Stand - You can mount the unit on a VESA stand rather than on the wall .
